### FAST TRACK ACTION LIST FOR ATTACHMENTS

- P** Ensure new version is installed on PCs for ALL AutoHYENA users
- P** Distribute User Advice Notice (PINK) to all AutoHYENA Users
- P** Archive all previous AutoHYENA disks and CDs.

### UPDATE TO COMPUTER PROGRAM AutoHYENA

In accordance with your Maintenance Advice Agreement for the ACADS-BSG program AutoHYENA, enclosed is:

1. A CD containing a new version 4.00.2 of the program
2. A User Advice notice describing the enhancements in this version

To update to the new version you can either :

- (a) Uninstall the previous version (go to control panel/Add Remove Programs and Remove) and then insert the CD in your CD drive and install this new version. Note however that if you have edited the fitting lengths for the cutting sheets, you should make a back-up copy of the file GfittingsM.txt in your HYENA directory and then copy this back into this directory after you have re-installed AutoHYENA.

The program should automatically commence installation. Now just follow the instructions on the screen. If the CD does not install automatically, click the Start Button, select RUN then enter D: setup.exe where D is the CD drive or, from Explorer in the CD Drive, select SETUP.EXE.

You will be asked to enter the directory you wish the program to be installed in. The default is C:\HYENA60, the directory where HYENA is also installed. AutoHYENA must also be installed in this directory.

Note that you will also need to reload the AutoHYENA menu file as described in the attached revised copy of Appendix D of the User Guide.

OR

- (b) Insert the CD in your CD drive and when the program attempts to install, select the Cancel button. Then, using Explorer, simply copy the files in the sub-directory "Update to Version 4.00.2" on the CD into your AutoHYENA directory, overwriting the existing files.

The same unlocking string will apply for this new version and the file that controls this (asphy.str) will not be removed if you uninstall the previous version. If for some reason, you encounter problems with this please email the ACADS-BSG office with the serial number – [acadsbsg@ozemail.com.au](mailto:acadsbsg@ozemail.com.au).

After installation it is suggested that you keep the enclosed CD in a secure location as a master copy. If you have any problems with running the program, please don't hesitate to contact Trevor Kingston or myself on (03) 9885 6586. As with all our software we are always looking for suggestions from users, so if you have any comments, we would appreciate hearing from you.
